(a) All overdue securities, except US dollar denominated securities.

(b) The Australian dollar equivalent of securities denominated in foreign currencies has been calculated in this table at the rate of exchange at 28 June 2013. This is a convenient method of showing the total amount in one currency, but the cost in Australian dollars of meeting these repayments in due course will be different from the amounts shown, reflecting exchange rates when the payments are made.

(c) All State securities and Commonwealth overdues are measured at accrual book value which approximates market value.
